and expertise reaching far into the past.

14. OKTOBAR d.o.o. Kruševac is a factory that has been producing metal parts for tank, artillery, mortar ammunition and missiles for more than 30 years.

The program includes standard caliber from 60mm to 128mm, which is technologically conquered and the production of multi-part shell bodies for caliber 155mm. We can offer shell bodies at the semi-finished stage (slit and heat-treated shell bodies) or colored set of body shell and rings.

- Finished components may be phosphated on both the internal and external surfaces.
- The internal surface may be coated with bituminous paint, asphalt varnish, or primer.
- The external surface may be coated with an appropriate protective paint system, primer, or preserved with oil.

The company 14. OKTOBAR d.o.o. Kruševac
is a member of the industrial-technological group CSG. CSG is a dynamic group of more than 100 manufacturing, development, and trading companies based in several European countries and the USA, with over 14,000 employees and revenues exceeding 6 billion EUR.
